- Non-fuming
- Zero VOC

Metal Prep Cleaner

Description

A non-corrosive and non-fuming cleaner that removes rust and oxidation from metal and etches the surface in preparation of painting. The product has a VOC of zero.

Application

Prepares metal for painting by cleaning the surface. Brightens and removes rust from metal.

Directions

Before painting, soldering or welding use Metal Prep full strength to remove rust and etch metals (including galvanized). Rinse with clean water and dry quickly. Use 1 part Metal Prep to 3 parts water on copper, brass, boats, shower stalls, radiators, tools, heating refrigeration and water systems. When possible soak 1 to 3 hours or sponge until rust, oxidation, oil, or grease is removed. Rinse with clean water and dry quickly.

Important label information

CAUTION: HARMFUL IF SWALLOWED OR INHALED. SKIN AND EYE IRRITANT. Before use, always read all information and warnings on container. Material safety data sheet available upon request.
